## **Medical**

## **Update**

“Rural” doctors in the past haven’t always had access to the same educational opportunities as metropolitan doctors. Now with this site, they can watch the same presentations from the same top presenters within days of their metropolitan colleagues. Medicalupdate.com.au is a free password protected website for Australian medical practitioners. It hosts live and archived webcasts (including PowerPoint slides) of medical meetings filmed throughout Australia. (It’s a little like You Tube for doctors) Viewers see the speaker and the slides in unison, providing a viewing experience better in many cases than that obtained at the event itself. The presentations are easy to navigate, so viewers can “fast forward” to areas of interest. To ensure the quality of the content, it is important to know that they are also extensively reviewed to ensure they comply with Medicines Australia guidelines. Doctors from your division can register and view these meetings free of charge; all they need is a broadband connection and a provider number. For more information please see [the flyer](#) or go to: [www.medicalupdate.com.au](http://www.medicalupdate.com.au)
